

# Responsible Minerals Statement

DRB Holding Co., Ltd. prohibits the use of conflict minerals\* and cobalt mined and distributed due to human rights violations and environmental destruction in conflict areas, including 10 African countries (Democratic Republic of Congo (DRC) or any of the DRC's adjoining countries) to mitigate the risks. We will identify and encourage our suppliers to conduct due diligence by third-party organizations under the Responsible Minerals Assessment Program (RMAP\*) for smelters in the supply chain.

In addition, for our future business partner, DRB will strengthen the supply chain assessment system (using CMRT, CRT\*) and identify the certified smelters in advance.

Furthermore, to expand our responsible minerals sourcing policy to our supply chain, we will guide all suppliers to follow DRB's Responsible Minerals Policy.
